OUR TEAM

We are dedicated to treating patients who may greatly benefit from ketamine infusion treatment. We collaborate closely with referring providers and tailor individual treatment plans to each one of our patients based on their needs. We strive to not only provide optimal care but to also deliver safe and effective therapy in the shortest time possible.

Christopher Ray, M.D.
Board-Certified
Anesthesiologist

Dennis Blaha, M.D.
Board-Certified
Anesthesiologist

**Michael V. Genovese,
M.D., J.D.**
Board-Certified
Psychiatrist

OUR GOAL

We strive to restore hope in those who have endured so much hardship with less than adequate results from medications, counseling, alternative therapies and even lifestyle changes.

HOW DOES IT WORK?

Ketamine works by repairing your brain on a cellular level. It causes new growth, rewires pathways and restores connections all while activating, balancing and blocking key receptors. These effects specifically target areas of the brain that deal with mood and emotion. At the same time, Ketamine blocks and “reboots” receptors throughout the body that are responsible for communicating pain signals. Our infusion treatment is designed to harness these unique properties of Ketamine and as a result, has become a highly effective treatment option for behavioral health and chronic pain conditions.

CONDITIONS WE TREAT INCLUDE:

Anxiety Disorders

- Obsessive-Compulsive Disorder (OCD)
- Post Traumatic Stress Disorder (PTSD)

Depression Disorders

- Major Depressive Disorder (MDD)
- Postpartum Depression (PPD)
- Treatment Resistant Depression (TRD)

Medication Reduction

Suicidality

Chronic Pain caused by:

- Arthritis
- Crohn's Disease
- CRPS/RSD
- Fibromyalgia
- Lyme's Disease
- Migraines
- Multiple Sclerosis
- Neuropathic Pain
- Neuropathy
- Phantom Limb
